Oak Hills High School traffic issues subject of community meeting

An Oak Hills High School community roads meeting is planned for next Wednesday, March 15, from 6 to 8 p.m.

Following the 2009 opening of Oak Hills High School in 2009, the Hesperia Unified School District, the City of Hesperia, and San Bernardino County partnered to fund a traffic study to look for solutions after local residents voiced concerns about bottlenecks, gridlock and dust.

David Evans and Associates, Inc. of Victorville was retained to conduct the study. Senior Project Manager Robert Kilpatrick will conduct next week's community meeting as part of the effort to collect public input.

The meeting will be conducted at the Oak Hills High School Large Meeting Room near the Performing Arts Center (PAC). The high school is located at 7625 Catana Road in Oak Hills, just north of Ranchero Road.

In advance of the meeting, questions can be directed to Mr. Kilpatrick at (760) 524-9115, ext. 39115, or via email to rkilpatrick@deainc.com.
